

EXPLORE[®]

Career Exploration with EXPLORE[®]

Counselor/Instructor Directions: The following materials are designed to help stimulate career exploration and postsecondary planning for students who take EXPLORE. These materials presume that students have completed the three steps in the “Your Career Possibilities” section on the EXPLORE Student Score Report. Before beginning this exercise, be sure your students have completed those steps.

Suggestion

A brief discussion of the motivations that your students have toward their future careers may be a good way to engage students in the “Your Career Possibilities” exercise. Consider asking questions like: What kinds of jobs have you thought about doing after high school? Have you thought about which colleges you might like to go to or what you might like to major in? How do you think your high school coursework affects your future? These are good ways to get a sense of your students’ goals and plans.

Your Career Possibilities: Student Exercise

- A.** Steps 1–3 of “Your Career Possibilities” appear on side one of your EXPLORE Student Score Report. If you have not already done so, complete those steps.
- B.** Look over the Career Areas you circled in Step 3. Select at least two Career Areas that look interesting to you. Write them here.

You have had a chance to think about things that interest you since you took EXPLORE. List here any Career Areas you would like to learn more about.

- C.** Look at the Career Area Charts on pages 4 to 11. They list over 500 job titles by Career Area. Using the Career Areas listed above, check the charts for jobs that interest you. Write them down in the table on page 3. You can choose other Career Areas to explore later.
- D.** Write down the Career Area letter, job description page number, educational preparation level, and related high school courses to consider for each job you selected in Step C. All the information is in the Career Area Charts on pages 4 to 11.
- E.** Go to “Your Plans for After High School” and “Your High School Course Plans Compared to Core” on side one of your EXPLORE Student Score Report. Now look at the level of preparation and related courses of the jobs you are exploring. Do your education plans put you on track to meet your goals? Beside core courses, what other courses should you consider?

Your EXPLORE test scores show you what skills you have now. You have time to decide what kind of job you would like to have and what kind of educational preparation is required. Make sure you ask for help when you need it.

Jobs to Explore	Career Area Letter	Job Descriptions A	Job Descriptions B	Educational Preparation Level (Prep Level)	Related High School Courses
Example: Broadcast Technician	N	page 324	page 261	2–3*	Math and Computers, Physical Sciences, Trade & Industrial

Job description numbers refer to pages in (A) 2008–2009 or (B) 2006–2007 edition of the *Occupational Outlook Handbook* (OOH), a book that describes jobs. Ask your teacher, counselor, or librarian for a copy of this book, or go to www.bls.gov/oco/ on the Web.

Education Preparation Level shows the amount of education and training workers typically have.

- 1 High School and on-the-job training
- 2 High School and up to two more years of education/training
- 3 Four or more years of education/training beyond high school

*Apprenticeship may be required

What is the “World-of-Work Map”? How does it work?

Exploring careers is easier if you have a good map. The World-of-Work Map can give you a sense of direction. The map shows how Career Areas differ in their involvement with four basic work tasks:

- People: people you help, serve, care for, or sell things to
- Data: facts, numbers, files, business procedures
- Things: machines, tools, living things, and materials such as food, wood, or metal
- Ideas: knowledge, insights, and new ways of expressing something (with words, equations, music, etc.)

These four work tasks are the four “compass points” of the Map. For example, occupations in Career Area C (Management) mostly involve working with people and data, so it is located in the upper left part of the Map. On the other side of the Map, Career Area P (Natural Science & Technologies) mostly involves working with ideas and things.

My interest inventory results are in Region 99. What does this mean?

Your pattern of interest scores does not suggest a clear direction at this time. As you complete Step 3 on your Score Report, think about your preferences for the four basic work tasks (People, Data, Things, Ideas). This can help you select Career Areas to explore.

My interest inventory results don’t agree with the Career Area I chose. Is this a problem?

No. Each is important, and only you can decide how much attention each deserves. Talk to your counselor or teacher if you need to sort things out.

Career Area Charts

The charts below group similar occupations (“jobs”) into career areas. Within each career area, jobs are arranged by the level of formal preparation (education and training) people in the jobs typically have. More than 500 jobs are listed. Information about each job listed can be found at the EXPLORE website: www.actstudent.org/wwm/explore_world.html.

KEY	<p>Job Descriptions: The <i>Occupational Outlook Handbook</i> (OOH) describes jobs and the outlook for job openings. Ask your counselor which source to use. A = 2008–09 OOH; B = 2006–07 OOH. When a specific job is not covered, but related jobs are, a ■ appears. The online OOH can be found at www.bls.gov/oco/</p>
	<p>Preparation (Prep) Level: Typical amount of education/training: 1 = High school and on-the-job training; 2 = Up to two years beyond high school; 3 = Four or more years beyond high school. Many jobs have a wide range of typical education/training: 1–2 = 1 or 2; 1–3 = 1, 2, or 3; 2–3 = 2 or 3. * = Apprenticeship may be required.</p>
	<p>Related High School Courses: General categories of high school courses that are most related to the occupation. Keep in mind that many of the courses that are required for high school graduation (e.g., English) are related to a wide range of occupations.</p>
